

Lesson 2

Problem Set

- Line segments drawn to given lengths
 - $2.6 \text{ cm} = 2\frac{6}{10} \text{ cm}$
 - $3.4 \text{ cm} = 3\frac{4}{10} \text{ cm}$
 - $3.7 \text{ cm} = 3\frac{7}{10} \text{ cm}$
 - $4.2 \text{ cm} = 4\frac{2}{10} \text{ cm}$
 - $2.5 \text{ cm} = 2\frac{5}{10} \text{ cm}$
- Models shaded appropriately
 - 2.6
 - $4.2; 4 + \frac{2}{10} = 4 + 0.2 = 4.2$
 - $3.4; 3 + \frac{4}{10} = 3 + 0.4 = 3.4$
 - $2.5; 2 + \frac{5}{10} = 2 + 0.5 = 2.5; 2.5$
 - $3.7; 3 + \frac{7}{10} = 3 + 0.7 = 3.7; 1.3$

Exit Ticket

- Line segment drawn to given length; $4\frac{8}{10} \text{ cm}$
- $3.7; 3\frac{7}{10}$; models shaded appropriately
 - $2.4; 2\frac{4}{10}$; models shaded appropriately; 2.6

Homework

- Line segments drawn to given lengths
 - $2\frac{6}{10} \text{ cm}$
 - $3\frac{5}{10} \text{ cm}$
 - $1\frac{7}{10} \text{ cm}$
 - $4\frac{3}{10} \text{ cm}$
 - $2\frac{2}{10} \text{ cm}$
- Models shaded appropriately
 - 2.4
 - $3.8; 3 + \frac{8}{10} = 3 + 0.8 = 3.8$
 - $4.1; 4 + \frac{1}{10} = 4 + 0.1 = 4.1$
 - $1.4; 1 + \frac{4}{10} = 1 + 0.4 = 1.4; 3.6$
 - $3.3; 3 + \frac{3}{10} = 3 + 0.3 = 3.3; 1.7$
